## SECTION 4 FIRST AID MEASURES

**Eyes:** Flush immediately with water for 15 minutes. Consult a physician if irritation persists.

**Skin:** Wash affected area with soap and water for 15 minutes. Launder contaminated clothing before reuse.

**Inhalation:** Remove subject to fresh air.

**Ingestion:** Do not induce vomiting. Get immediate medical attention. Never give anything by mouth to an unconscious person.

## SECTION 5 FIRE FIGHTING MEASURES

**Flash Point/Method:** 199°C (390°F) (National Fire Protection Association, Fire Protection Guide to

Hazardous Materials, 13 ed., 2002)

**Upper Explosive Limit/Lower Explosive Limit: Lower:** 0.9%

**Auto ignition Temperature:** 370°C (698°F) (NFPA Fire Protection Guide to Hazardous Materials, 13<sup>th</sup> ed., 2002; NIOSH ICSC, 2001; CHRIS, 2001)

**Extinguishing Media:** Use water spray to cool fire-exposed containers. Use agent most appropriate to extinguish fire. Use water spray, dry chemical, carbon dioxide, or appropriate foam.

**Hazardous Combustion Products:** Incomplete combustion can yield low molecular weight hydrocarbons, carbon monoxide.

**NFPA Rating (estimated):** Health: 1; Flammability: 0; Instability: 0

**Fire Fighting Instructions:** As in any fire, wear a self-contained breathing apparatus in pressure-demand, MSHA/NIOSH (approved or equivalent), and full protective gear. During a fire, irritating and highly toxic gases may be generated by thermal decomposition or combustion. Use water spray to keep fire-exposed containers cool. Vapors may be heavier than air. They can spread along the ground and collect in low or confined areas. Containers may explode when heated.

**Unusual Fire and Explosion Hazards:** There is the possibility of pressure build-up in closed containers when heated. Water spray may be used to cool the containers.

## SECTION 6 ACCIDENTAL RELEASE NUMBERS

**Personal Precautions:** Wash hands with soap and water.

**Land Spill:** Control spills with acceptable methods established by Local, State and Federal Government agency. Ventilate area of leak or spill. Clean-up personnel may require protective clothing. Absorb liquid spill with dry absorbent. Containerize material for disposal in an approved waste facility. Remove sources of ignition and contain spill to smallest area possible. Stop leak if possible. Recover large spills for salvage or disposal. Wash surface with solvent or detergent.

**Water Spill:** Control spills with acceptable methods established by Local, State and Federal Government agency.
